

Uh Huh Her, Wait Another Day

I look at the starlight,
I am shattered by the night
Always run where I can and
I hide where I wanna hide
But it feels so right,
I want it tonight
It feels so right

Oh, I went out of my mind
I am caught here
one more time
I know how it feels tonight
I can do nothing about it
But it feels so right,
I want it tonight
You feel so right

I will wait to love you
I will wait another day
For you I'd leave
all this behind (Oooh)
I will wait for you tonight
I will waste
another dream on you
Always run to you, run

I will take the long road
But it leads right
back to you
Follow you into the sun
I will steal this
time for you

But it feels so right
I want it tonight
You feel so right

Oh, I will wait to love you
I will wait another day
For you I'd leave
all this behind (Oooh)
I will wait for you tonight
I will waste
another dream on you
Always run to you

I will wait to love you
I will wait another day
For you I'd leave
all this behind (Oooh)
I will wait for you tonight
I will waste
another dream on you
Always run to... you, run
