

Ultravox, Satellite

Shine from above you satellite
Follow your lead follow your light
Libertine blue and angel white
Free to release my dark tonight.

Oh, i defy you
Let your light shine on me tonight
Do, do what you know
Know to be right
Wondrous satellite.

Feed me with all the hope you find
Lovingly laid but cruel, unkind
Whisper to me with words so blue
Feed me your drug to see me through.

Oh, i defy you
Let your light shine on me tonight
Do, do what you know
Know to be right
Wondrous satellite.
