

# Under The Shadow, Dim Reflection

Dim reflection in the window  
I look inside to say hello  
You look right past me like you don't know  
Where am I supposed to go?

Just wait and bleed again  
Just wait until the end  
It's almost over and  
I forgot to begin

Lost reflection in the window  
I see a face that I should know  
And as I get a little closer  
I see the face is my own....

I see the face is my own...

look closer

Dark reflection in the window  
A piece of life I should know  
As I look a little closer  
You were there all along
