

# Universal Hall Pass, Solar/Lunar

Can't you make this thing move faster?  
I'm trying to save us all from something disastrous  
And when I'm safe and out of danger  
I'll send a message from my spaceship Andromeda

Nearing objective  
Everything's go here

Solar  
I'll do anything for you  
Lunar  
I'll do anything for you  
Solar

It's empty in the Alpha Sector  
So cut your engines and stay tuned to my frequency  
A static signal interruption  
I hope you caught that  
'Cause there are spikes in my status field

Origins unknown  
Something is strange here

Solar  
I'll do anything for you  
Lunar  
I'll do anything for you  
Solar

Eleven hours since transmission  
Maintain positions and keep all channels on receive  
Another static interruption  
I know we caught that  
Keep in loop signal translator

70 hours and I'm starting to feel like I'm Pi on a calculator  
Endless and unfamiliar  
Translation download T minus 17  
Hey, is that corona lighting the atmosphere?  
It's well worth the wait  
My god, that's amazing  
It says, please take a lot of photos  
Sidestep new solar systems  
Right now you're not ready  
But someday you will be

Nearing objective  
Everything's go here

Solar  
I'll do anything for you  
Lunar  
I'll do anything for you  
Solar  
I'll do anything for you  
Lunar  
I'll do anything for you  
Solar
