Vendetta Red, Gloria

took half your face and both your eyes it left you nothing but paralyzed and mushroom clouds it left behind our city's crumbling but i don't mind the ether tastes like nausea, a permanent distraction from the waking world outside

rain down, gloria rain down, gloria rain down, gloria rain down, gloria

like scared teens on ecstasy an epileptic dance party so shut your mouth and don't you scream just hold my hand girl and dance with me to the sound of severed hands clapping and our untimely funeral bombs wrap children round sweet scents

rain down, gloria rain down, gloria rain down, gloria rain down, gloria

in the soundful rain in the flames in the fallout i hear the echoes of an empire calling out your name what goes to show me what your to serenade and through the smoke i heare them singing i hear them singing gloria

rain down, gloria rain down, gloria rain down, gloria rain down, gloria
