

Volbeat, We

Its good to be here, long time no see my dear
I took the run out to the road to find a way
But the loneliness broke into tears
I believe I was wrong but baby
now I know your love is not a thing
You throw out in the cold and walked away
Im so sorry, please say you forgive

Close your eyes baby and lend me your finger
Together we walk out as one
No lonely nights, broken promises or fights will
return anymore

I remember a time I believe I was fine
But inside my heart broke down in two
Something inside starts to burn like a fire
And I knew it was you

Were broken and damned
But together well find a way
And no longer shall hell awaits
We will seek all the light in the day
Cause forever our love will breathe

Close your eyes baby and lend me your finger
Together we walk out as one
No lonely nights, broken promises or fights will
return anymore

I remember a time I believe was fine
But inside my heart broke down in two
Something inside starts to burn like a fire
And I knew it was you

Were broken and damned
But together well find a way
And no longer shall hell awaits
We will seek all the light in the day
Cause forever our love will breathe

Were broken and damned
But together well find a way
And no longer shall hell awaits
We will seek all the light in the day
Cause forever our love will breathe
