

# Waik, Into The Ground

Throw the switch down now, it's never felt so alive, take a snapshot of my  
Mind, what's hidden inside, you'll know soon, inhibitions gone  
Mind, on the outside, go slow slow, now put to its best use.

She touches me, in ways i've never ever seen, she touches me

Mind, manipulate time, I swallow, time to catch my breath  
Mind shifting time, don't go home, I'll put to its best use.

She touches me, in ways i've never ever seen, she touches me

It's time to wake up from this, you've suffered long enough  
No longer running from it, you suffer long enough.

It's never felt so alive, take a snapshot of my  
Mind, what's hidden inside, you'll know soon, inhibitions gone  
Mind, on the outside, go slow slow, now put to its best use.

She touches me, in ways i've never ever seen, she touches me

It's time to wake up from this, you've suffered long enough  
No longer running from it, you've suffered long enough.
