## Waikiki, Frail

I walked into the cathedral As I fell onto the steeple And it made me feel so Honest and frail As I leant upon the table I worked as if I were unable Then I saw him Sliding my way

And he said don't be
Do not be afraid
We are living in this big old movie god has made
And we're sifting through the breeze all alone
Now we're just about to start the main show

So I looked at him and whispered Thanks a lot, but I think I missed it Well he said do not fret We're playing it again

Well he said look above they're shooting it from heaven And he said don't be Do not be afraid

We are living in this big old movie god has made And we're sifting through the breeze all alone Now we're just about to start the main show da da da, da da da da da...
