

Wanderers, Peter Beter

(Goldstein/Treganna)

peters audio letters believe in what they say
he warned us of the cosmospheres that wiped the USA
partule beam weapons came bouncing off the moon
of operation table top, battle of the harvest moon
dr beter, peter beter, dr beter
his claims are even more amazing than at first appears
the rockefeller murders, assassinations through the years
you watch your bruised and battered world in your vacuum jaws
your robotoid president lost the third world war
many men took part in it, four set the stage
politicians and the pope, you would be amazed
the rockefeller dynasty, the mid-east oil trick
ft knox gold, all was stoled, by the bolsheveks
only thirty seconds the message will begin
his information service of all the world sins
the actor pope conspiracy, can't learn it off the tube
send off now, don't be late you've everything to lose
