

Warren Barfield, This Road

Another day, another town
The window rolled down I got the wind blowing on my face
Well every twist every turn another lesson learned
In this thing we call the human race

They say life, is a highway and no one knows whats around the bend
An adventure is waiting lets set out and discover it

Were on this road together leaving the past in a cloud of smoke
Headed on to forever as we follow the One who knows this road

Everywhere, everyone is certain to belong, knowing people lost in a crowd
Oh, my friend come on theres no need to be alone
this road is better together Ive found.
Oh the mountains, through valleys well be taking in the highs and lows
Its the journey of a lifetime only God knows where it goes

On this road together leaving the past in a cloud of smoke
Headed on to forever as we follow the One who knows this road
Yeah, This Road

Through the dark night, dont give up just keep driving
Cause a blue sky is out there over the horizon
They say life is a highway, no one knows whats around the bend

Oh, Were on this road together leaving the past in a cloud of smoke
Heading on to forever as we follow the One who knows this road
Together yeah were leaving the past in a cloud of smoke
Heading on to forever as we follow the One who knows this road

Oh this road
This road
