

We Are Harlot, Dancing On Nails

I saw you come in from across the room with that look in your eye
Imagination running wild, I'm doomed to a good morning-good bye
You got me sick and I can't find the remedy
Your breath against my neck, it grabs a hold of me
I lost control I feel it in my bones, there's something telling me to stop but I just can't say no

You got something worth exploring
I must me crazy, you got me feelin' like I'm dancing on nails

Infatuated with the way you move when all the lights go down
The smell of sex is all it takes and you, you let the animal out
There's no resisting all those things you do to me
That raw seduction only you can guarantee
I've lost control, I feel it in my bones, there's something telling me to stop but I just can't say no

You got something worth exploring
I must me crazy, you got me feelin' like I'm dancing on nails

I like the way you sway, with every beat we're getting closer to just slipping away
You run me right off the rails, you got me feeling like I'm dancing on nails

You got something worth exploring
I must me crazy, you got me feelin' like I'm dancing on nails
