

# Wheatus, That was then, this is now

Some things I guess I won't forget  
Like my first time on the night we met  
I wish I could go back there tonight, tonight  
Tonight  
Looking in your eyes the way you held me tight  
Weeded all the wrong, when it felt so right  
There's nowhere I'd rather be tonight, tonight  
Tonight  
Funny how u said people never change  
Always be together 'til the very end  
But that was then and this is now  
Funny how I have to take you everywhere  
Just to believe no matter what I had  
But that was then and this is now  
You and me were like a movie scene  
Superstars playing in a teenage dream  
(?) one left tonight  
Guess you could've broken someone else's heart  
I'm the big winner because I played the part  
Don't wanna say goodbye tonight, tonight  
Tonight  
Funny how u said people never change  
Always be together 'til the very end  
But that was then and this is now  
Funny how I have to take you everywhere  
Just to believe no matter what I had  
But that was then and this is now  
I feel first my life  
But never ever be another one  
You and me Together was so much fun  
I feel first my life  
But never ever be another one  
Don't wanna tell no one  
You and me together was so much fun  
Sometimes you gotta let things be  
Even when the truth is that you lied to me  
But I wanna keep those thoughts away, from me  
From me  
It's the little things that I dream about  
That no one ever talks about  
The little things I think about  
That no one ever dreams about  
The kisses that were promised  
?As we whispered our plans?  
Funny how u said people never change  
Always be together 'til the very end  
But that was then and this is now  
Funny how I have to take you everywhere  
Just to believe no matter what I had  
But that was then and this is now  
Funny how you said we would never change  
Let me tell you something baby, life is strange  
But that was then and this is now  
Remember me, remember me  
Remember me, remember me  
Remember me, remember me
