

# Will.I.Am, Reach for the Stars (Mars Edition)

Why they say the sky is the limit  
When I've seen the footprints on the moon?  
Why do they say the sky is the limit  
When I've seen the footprints on the moon?  
And I know the sky might be high  
But baby it ain't really that high  
And I know that Mars might be far  
But baby it ain't really that far  
Let's reach for the stars

Reach for the stars  
Let's reach for the stars  
Reach for the stars  
Let's reach for the stars  
Reach for the stars  
Let's reach for the stars

(let me see your hands up)  
(let me see your hands up)

Can't nobody hold us back  
They can't hold us down  
They can't keep us trapped  
Tie us to the ground  
Told your people that we don't mess around  
When we turn it up  
Please don't turn us down  
We will turn it up  
Louder than we was before  
Like the lion out the jungle, you can hear us roar  
When I lie in here, it's like a sonic blaster  
Flying just like nasa, out of space master

Hands up, reach for the sky  
Hands up, get 'em up high  
Hands up, if you really feel alive  
Live it up, live it up

Why they say the sky is the limit  
When I've seen the footprints on the moon?  
Why do they say the sky is the limit  
When I've seen the footprints on the moon?  
And I know the sky might be high  
But baby it ain't really that high  
And I know that Mars might be far  
But baby it ain't really that far  
Let's reach for the stars

Reach for the stars  
Let's reach for the stars  
Reach for the stars  
Let's reach for the stars  
Reach for the stars  
Let's reach for the stars

(let me see your hands up)
