

# Willie Nelson, It Always Will Be

Sometimes I think  
That love is somewhere  
Livin on an island all alone  
I can see it in the darkness  
I can feel it in the distance  
And then its gone

And then I know that it is time  
For me to go and find my favorite girl  
Cause when I look into her eyes I see  
All the love there is in all the world

And it always will be  
And it always will be  
And it always will be  
It always will be

There are some things I think about  
And every time I do it breaks my heart  
And there is nothing I can do  
About this loneliness I feel when we're apart  
I stop and curse the darkness and the distance  
And then your face I see  
And when I look into your eyes I see  
All the love there is inside of me

And it always will be  
And it always will be  
And it always will be  
It always will be

And it always will be  
And it always will be  
And it always will be  
It always will be
