

# Willie Nelson, The Part Where I Cry

Life is a picture and I play the lead but my biggest line was goodbye  
Now my leading lady has walked out on me and this is the part where I cried  
I was great in the scene where she found someone new  
You should have seen my look of surprise  
And if you'll have just walk into the picture this is the part where I cry

And after the picture is over and it's judged for the part where you lied  
The award of the chiefment that's given will be mine for the part where I cried  
I was great in the scene...
