

# Wolfpakk, Cold Winter

It's freezing cold-we need hideaway  
The hollow cave is not that far from here  
We have been there for so many times  
Give me shelter-ease my fear

Our braveness will help us on the way  
Strong hearts - until the end of day

Can we survive  
Just another winter  
It's cold out there  
Sun's been away too long  
We're suffering from  
Another long cold winter  
With the pakk  
We are moving on

We were born under the moonlight  
It will always guide us home  
The sky is grey a surreal landscape  
Persistent snowfall birds are gone

Our braveness will help us on the way  
Strong hearts - until the end of day

Can we survive  
Just another winter  
It's cold out there  
Sun's been away too long

We're suffering from  
Another long cold winter  
With the pakk  
We are moving on

Winter freeze  
Hiding from the wind  
Hold together  
Waiting for the spring

Can we survive  
Just another winter  
It's cold out there  
Sun's been away too long

We're suffering from  
Another long cold winter  
With the pakk  
We are moving on

Can we survive  
Just another winter  
It's cold out there  
Sun's been away too long  
We're suffering from  
Another lonely winter  
With the pakk  
We are moving on
