

Wynonna Judd, What The World Needs Now

I look around at all the faces and I see,
All the lonely people, looking back at me.
Rich, poor, don't matter, we're all the same,
Everybody's hungry in a different way.
We're callin' and climbin' and kickin' and screamin' and fightin' but really

Chorus

What the world needs now is love, love and only love,
A little help from up above,
Fit to make a better day.
Let's come together let our differences down,
Spread it all around,
That's what the world needs now.

Sometimes all it takes is just a smile,
To change somebody's weather, chase the clouds out of the sky.
Or sometimes you gotta give and not receive,
Sometimes you gotta live what you believe,
Open your arms, 'cause that's where it starts, right here with you and with me.

Chorus

Nobody likes the cold,
We all need someone to hold,
Noone wants to be alone.

Chorus
