

# Xandee, I Need You

Like a Burning flame, your love is deep in me  
it's like a storm inside, baby can't you see  
I can't sleep at night, could this truly be right  
you wanna leave me here, leave me out of sight  
you said you found a girl, whose love rocked your world  
Ain't too proud to shout it out loud...  
I need you, to hold me close when I'm down  
I need you, to smile when I come around  
because of you, the love I lost is found  
I need you, to pick me up from the ground  
If I could press replay, would that make you stay  
(come on baby give me one more day  
I know I can make you stay)  
I'm really sorry boy, that you walked your way  
(why you gonna play me like that  
you know I love you that's a matter of fact)  
this girl's got more in store, my love you can't ignore  
my heart's numb and sore, tell me what's the score  
did you regret this love, sent straight from above  
Ain't too proud to shout it out loud...  
I need you, to hold me close when I'm down  
I need you, to smile when I come around  
because of you, the love I lost is found  
I need you, to pick me up from the ground  
You have got to know  
I need you to show to never let go  
cause you're my one light  
to stay for the night and say it's alright  
cause there's no way out  
turning my back and caught in the act  
so don't cut me off  
the love we found and break it all down
