Bananarama, Only Time Will Tell

Was it written in the stars how I feel it in my heart?

Will I wake up from a dream? Ooh, all my senses are colliding

Feelings running round inside me

Deep in the night, I hope I'm right

Or will our love drift away on the breeze?

Do we have a future or will love become a memory?

Since the day we fell, we knew the story well

Only time will tell, only time will tell

Could this be my destiny when you're lying next to me?

Feel the rhythm of our love, ooh may I never watch our love go

Disappearing into shadow

Deep in the night, I hope I'm right

Or will our love drift away on the breeze?

Do we have a future or will love become a memory?

Since the day we fell, we knew the story well

Only time will tell, only time will tell

Do we have a future or will love become a memory?

Since the day we fell, we knew the story well

Only time will tell, only time will tell

Ooh, all my senses are colliding

Feelings running round inside me

Deep in the night, I hope I'm right

Or will our love drift away on the breeze?

Do we have a future or will love become a memory?

Since the day we fell, we knew the story well

Only time will tell, only time will tell
