

# Crab Invasion, One Day

You took me under the roof  
Under  
You took up with that  
We took up with that  
Sheltered from the wild wind  
and coldness  
That's what keeps us close  
Still

I know it's something that you'll never commend  
But I hope it's something that you'll understand  
I know it's something that you'll never commend  
But I hope it's something that you'll understand

It's been the while since the roof lowered  
I took up with that  
We took up with that  
Now girl I hope we'll find places to  
Lift us up then we'll see

I know it's something that you'll never commend  
But I hope it's something that you'll understand  
I know it's something that you'll never commend  
But I hope it's something that you'll understand

I know it's something

That day when all is fine  
One day when all is fine  
That day when all is fine  
One day when all is fine again  
That day will surely come  
One day when all is fine again  
But now I must be gone
